BENEFITS

- ThermalStar Insulation Board is available in multiple standard thicknesses, ranging from 1/2" up to 4". Other thicknesses available upon request.
- The thermal properties of ThermalStar Insulation Board do not degrade over time, allowing the R-value to remain stable over the life of the structure.
- ThermalStar Insulation Board has high water vapor permeability so it allows for moisture to dry quickly in wall assemblies.
- The insulating cells of ThermalStar Insulation Board simply contain air, providing an environmentally friendly solution with a low global warming potential (GWP) and zero ozone depletion potential (ODP).
- ThermalStar Insulation Board is backed by a limited lifetime warranty for physical and thermal performance. See separate ThermalStar warranty for terms and conditions.
