DuraTherm SP Wine Shipper

New DuraTherm® with Sustainable Packaging (SP) Technology effectively insulates and protects your most important products throughout the entire distribution process. Manufactured with innovative SP Technology that facilitates anaerobic biodegradation of material in biologically managed or wetter landfill conditions in 4 years, DuraTherm with SP Technology provides thermal and material properties that are equal to traditional molded polystyrene. With facilities located nationwide, DuraTherm offers a full range of stock sizes and is manufactured under an industry leading quality control program. See additional information on the reverse for more product and testing details.

SP TECHNOLOGY

Atlas Molded Products offers SP Technology that allows the product to breakdown substantially if it finds it's way into the MSW (Municipal Solid Waste) stream rather than a MRF (Materials Recovery Facility). DuraTherm with SP Technology gives you the confidence that you are providing sustainable solutions no matter how the product life cycle comes to an end.

WINE SHIPPERS

BENEFITS

- Innovative SP Technology facilitates anaerobic biodegradation of material in biologically managed or wetter landfill conditions in 4 years. Note, biologically managed or wetter landfills may not exist in your area.
- Same thermal and material properties, processes, equipment, shelf life, storage requirements, and quality specifications as traditional molded polystyrene.
- Non oxo-degradable material; no microplastics.

TESTING

- DuraTherm SP Technology has been shown to biodegrade 90% over 4 years under circumstances that simulate both wetter and biologically active landfills when tested in accordance with ASTM D5511, "Standard Test Method for Determining Anaerobic Biodegradation of Plastic Materials Under High-Solids Anaerobic-Digestion Conditions". Wetter or biologically active landfills may not exist in your area. The stated rate and extent of degradation does not mean the product will continue to degrade.

See *Atlas Molded Polystyrene Tech Data Sheet* for a full listing of the physical properties.
